Duration - 6 months

PROFILE SUMMARY

Motivated web developer fresher proficient in frontend, backend development, and database management. Passionate about crafting responsive web applications prioritizing user experience. Eager to contribute to challenging projects, leveraging technical skills and a drive for innovation. Committed to continuous learning and growth in a collaborative team environment.

PROJECT

Food Order Application(Yummy)

[Project Link](#)

Skills : React.js, Swiggy API,Router, Redux

- Yummy is a modern web-based food ordering application built using React.js, React Router DOM, Redux, and hooks like useState, useEffect, and useContext.
- The application utilizes the Swiggy API to fetch restaurant data, menu items, and user reviews.
- It offers features such as top rating, searching by name, adding items to cart, and accordion navigation for improved user experience.

Netflix Clone

[Project link](#)

Skills : React.js, TMDB API, Redux, Firebase,Gemini AI

- Developed a Netflix clone application using React.js, Firebase Authentication, and TMDB API integration.
- Implemented user authentication functionalities for secure sign-in and sign-up processes.
- Integrated TMDB API to fetch comprehensive movie data, including trailers, titles, and descriptions.
- Incorporated GPT search functionality powered by Gemini AI API, enabling users to search for movies based on their preferences and language support also.
- Utilized Redux for centralized state management, enhancing data accessibility and manipulation.
